

Morton Thin BD Narrative
Aug 2, 2011
Tara Devenport

Costs and activities entered into FACTS for the BD appraisal are as follows (costs include a 10% Forest overhead cost):

Cover 48 Machine Landing Piles: \$35 I entered this as machine piling, because pile covering was not a menu option.

Fuel Break 2.7 acres: \$559.00 per acre This refers to roadside treatment. Treatment can consist of scattering fuels, piling, hauling, chipping, or pullback.

Burn 48 Landing Piles: \$148.50 per landing

Fuel Inventory: \$9.00 per acre This is for assessing fuels, monitoring, writing burn plans, smoke reporting and fees.

10% Forest Collection Rate for Equipment and Facilities is calculated in Direct Costs.

Here are the treatments broken down by unit number:

Unit 50 –Treat slash within 25 feet of Rd 1726. Treatment can consist of scattering fuels, directional felling, piling, hauling, chipping, or pullback. There is approximately 1.5 acres that will need to be treated. Pile landing slash. There will be an estimated 8 landing piles.

Unit 51 – Treat slash within 25 feet of road 1726. There are numerous landing sites on road 1726, excess road slash can be piled at landings. There will be an estimated 24 landing piles.

Unit 52 – Treat slash within 25 feet of road 1726. There is approximately .9 acres that will need to be treated. Pile landing slash. There will be an estimated 10 landing piles.

Unit 55 – Treat slash within 25 feet of road 1726. There is approximately .3 acres that will need to be treated. Pile landing slash. There will be an estimated 6 landing piles.

Units 46, 42, 39,36 – These units are off blocked road 1726129 and spurs. Scatter all landing slash.

Unit 41, 38, 45 – These units are off blocked road 1729 and spurs. Scatter all landing slash.
